朝陽科技大學 092學年度第1學期教學大綱
Architectural Material 建築材料

當期課號	4006	Course Number	4006
授課教師	蔡仁記	Instructor	,
中文課名	建築材料	Course Name	Architectural Material
開課單位	建築系(二日)三A	Department	
修習別	必修	Required/Elective	Required
學分數	2	Credits	2
課程目標	學習如何在多樣化的建築材料中，實品體驗各種不同的建材成分、性能、特質。思考如何在妥適地方運用建築材料，配合介紹具有啓發性的建築案例。	Objectives	This course provides studies about different kinds of materials reality exploration of composition and quality among these multiplex architectural materials nowsdays.Also describes concepts and techniques for properly determining scope of architectural materials through a sequence of introduction about the relevent inspirational architectural cases. Eith considering all aspects of factors such as：economy，boauty，safety，fire-resistance，energy-conservation and green architecture,in accordance with architectural materials demanded nowadays, this course aims to find ways to establish a unique architecture modus of Taiwan.
教材	1.課堂講授，輔以投影及幻燈片說明 2.實際去搜集尋訪建材，作更深入的產品介紹	Teaching Materials	
成績評量方式	1.平時表現及作業報告40%2.期中考30%3. 期末考30%	Grading	Attendence and Report 40% Mid-term 30% Final-term 30%
教師網頁			
教學內容	1.建築材料的基本性質2.建築週邊工程3. 混凝土4. 磚牆、石牆泥作工程5.金屬材料6.木材及塑膠製品7.隔熱及防潮材料8.門窗系列9.建築設備及特殊場所設備10.室內裝修及裝潢材料	Syllabus	This course gives students a general introduction in building materials, including the functions, styles, textile and the building code. The three major parts are (1) construction materials, (2) non-construction materials and, (3)interior-design materials. Students can choose the proper materials. in building construction after this class.
