朝陽科技大學 092學年度第2學期教學大綱
Environmental Psychology 環境心理學

當期課號	2250	Course Number	2250
授課教師	葉美智	Instructor	YEH,MEI CHIH
中文課名	環境心理學	Course Name	Environmental Psychology
開課單位	景觀及都市設計系(四日)三A	Department	
修習別	選修	Required/Elective	Elective
學分數	2	Credits	2
課程目標	「環境心理學」是一門關心人與環境之間的互動及關係的學科。環境心理學所關心的是人類和物理環境之間的關係，其內容包括建築、自然和社會環境以及對於個人或是相對於更大的團體或社會而言，其對環境反應的行爲表徵。環境心理學的重點在於人類的行爲、感受和身爲人類的知覺如何受到物理環境的互動影響，以及人們對人爲與自然環境危害的反應。	Objectives	Environmental psychology examines the interrelationship between environments and human behavior. The term environment is broadly defined to include all that is natural on the planet as well as social settings, built environments, learning environments and informational environments. When solving problems involving human-environment interactions it"s essential to have a model of human nature that predicts the conditions under which humans will behave in a decent and creative manner. The field develops such a model of human behavior while retaining its broad and inherently multidisciplinary focus. Using this model it explores such dissimilar issues as common property resource management, way finding in complex settings, the effect of environmental distraction on human performance, the characteristics of restorative environments, human information processing, and the promotion of environmental stewardship behavior. Environmental psychology recognizes the need to be problem-oriented, using, as needed, the theories and methods of related disciplines (e.g., psychology, sociology, anthropology, biology).
教材	互動式教學方式講解課程內容，透過小組作業練習，提高學習效果並建立團隊合作關係。	Teaching Materials	Besides instructing, it is especially emphasizing the interaction and empirical operation in the course.
成績評量方式	期中考佔30%, 期末考佔30%, 作業成績30%, 出席10%	Grading	Mid-term exam 30%, final exam 30%, assignments 30%, attentance 10%
教師網頁			
教學內容	環境心理學主要在研究實質環境和人類行爲、經驗之間的關係，環境偏好、行爲意向及資訊操作方式皆係爲確保生存及再造而自然形成。本課程主要內容包括環境心理學概論、環境認知、實質環境、環境壓力、個人空間、場域、擁擠、工作及學習環境、鄰里及自然環境、環境問題及解決對策等項目，透過理論及實際案例操作經驗，希望同學能對環境心理學有概念性的瞭解。	Syllabus	Environmental psychology studies the relationship between the physical and environment and human behavior and experience. Environmental preferences, behavior tendencies, and the way in which we process information have been shaped by natural selection to ensure survial and successful reproduction. The contents of this course include the introduction of environmental psychology, discussing how environmental information is stored and used, the emotional impact that environments have on human beings, describing the stress taht people experience from the extreme, intense,and unusual environment, examingthe built environment and

			explore it's importance in the human life,discussing the impact of nature and people on the environment.
