

朝陽科技大學 093學年度第2學期教學大綱
Data Mining 資料探勘

當期課號	7083	Course Number	7083
授課教師	李金鳳	Instructor	LEE,CHIN FENG
中文課名	資料探勘	Course Name	Data Mining
開課單位	資訊管理系碩士班一A	Department	
修習別	選修	Required/Elective	Elective
學分數	3	Credits	3
課程目標	本課程在導引學生了解何謂資料倉儲(Data Warehouse)系統、資料探勘以及它的應用，資料探勘應用包括預測(Prediction)、分類(Classification)、群聚(Clustering)以及關聯規則(Association rules)之採掘等範圍。	Objectives	An introduction to data mining and data warehousing: motivation and applications. Basic data warehousing technology: data cube methods, data warehouse construction and maintenance. Basic data mining techniques: characterization, association, classification, clustering, and similarity-based mining. Advanced data mining applications: mining relational and transaction data, mining time-related data, spatial data mining, textual data mining, multimedia data mining, visual data mining, and Web mining.
教材	Data Mining: Concepts and Techniques, Jiawei Han and Micheline Kamber, Morgan Kaufmann Pub., 2000. Selected Journal or Conference Papers REFERENCES: □ Data Mining Techniques --For Marketing, Sales, and Customer Support, Michael J A. Berry, Gordon Linoff, Wiley Computer Publishing □ Advances in Knowledge Discovery and Data Mining, Usama M. Fayyad, Gregory Piatetsky-Shapiro, Padhraic Smyth, AAAI/MIT Press, 1997. □ Knowledge Discovery in Databases, G. Piatetsky-Shapiro and W. J. Frawley, AAAI/MIT Press, 1991. □ Some recent conference/journal paper collection, (class distribution).	Teaching Materials	
成績評量方式	作業+報告+平時表現(出席率+上課Q&A)+其他、期中與期末考試、期末計畫書+專題報告+期末專題文件)。	Grading	Presentation+numbers of question+Assignments + Class presentation Midterm &Final termsProject and project documentation。

教學內容	TOPICS: □ An introduction to data mining and data warehousing: motivation and applications. □ Basic data warehousing technology: data cube methods, data warehouse construction and maintenance. □ Basic data mining techniques: characterization, association, classification, clustering, and similarity-based mining. □ Advanced data mining applications: mining relational and transaction data, mining time-related data, spatial data mining, textual data	Syllabus	OBJECTIVE/DESCRIPTION: Data Mining and Knowledge Discovery has become an active area of research, attracting people from several disciplines, including database systems, statistics, information retrieval, pattern recognition, AI/machine learning, and data visualization. The course will introduce data mining and data warehousing, and study their principles, algorithms, implementations, and applications.

mining, multimedia data mining,
visual data mining, and Web mining.
