開課單位	建築系(二日)三A	Department	
修習別	選修	Required/Elective	Elective
學分數	2	Credits	2
課程目標	介紹學生了解到室內設計和建築設計密不可分相互關係，並充分去了解觀察使用者的活動性質及行為的重要，並需了解融合適當的色彩、照明、建材、傢俱、擺飾等及相關的空間及造型理論，同學將來先行建立對於一個完整的室內設計應有的正確架構。	Objectives	Interior Spaces created by structures and shells of building. These spaces provide the physical context for much of what we do and like to the architecture which houses them. The propose of this course is to introduce to students of interior design those fundamental elements which make up our interior environments. It outlines the characteristics of each element and presents the choices we have in selecting and arranging these of them into design patterns. In making these decisions, emphasis is placed on basic design principles and how design relationships determine the functional, structural, and aesthetic qualities of interior spaces. The limits of interior design are difficult to define precisely since it lies in the continuum between architecture and product design. This introduction to interior design is therefore broad in space. The intent, however, is to accessible as possible, and stimulate future in depth study and research.
