教師網頁	-		
教學內容	This course is designed for students who have a bachelor's degree in business or equivalent. This course endeavors to emphasize finance principles and to illustrate how these principles can be mastered and transformed into sound and practical solutions of actual finance problems. The course progress structure reflects this approach: the material covered in the text book goes from the simplest in concept to the more advanced. Particular financial products and investment problems are treated, for the most part, in the order that they fall along this line of conceptual progression, their analyses serving to illustrate concepts as well as to describe particular features of the financial environment.
