The key light is the primary light in the scene and it simulates the natural light, e.g., the outdoors or an interior light. It is usually placed between 30 and 45 degrees from the camera-subject axis and is elevated by 30-45 degrees. More extensive lighting systems may include in this course, including 1.eyelight - a small light that can be focused to reflect in the subjects eye, giving them a reflective sparkle 2.chroma key's background light - to illuminate the background 3.kicker light - similar to a back light, i.e. it helps to separate the subject from the background. It is usually placed low, behind the subject, and may be opposite the key light.</p> <p>Fundamentals of the tools of the lighting design and practise for film and video production, Students will acheive their lighting techniques, skill of communication,and their ability of lighting aesthetics are covered.</p>
