課程目標	空間是生活的場所，本課程提供給室內設計初學者一個入門的窗口，廣泛地探討室內空間型態與涵構發展，設計元素與詞彙的綜合運用等，不僅加強室內設計基本空間規劃設計理論的介紹，並透過案例介紹說明等方式來評析室內建築空間環境之本質與設計，結合視覺美學與分享空間經驗，讓空間品味與生活美學自然而然地融爲一體。	Objectives	Interior Spaces created by structures and shells of building. These spaces provide the physical context for much of what we do and bike to the architecture which houses them.The propose of this course is to introduce to students of interior dishing those fundamental elements which make up our mterior environments. It outlines the characteristics of each element and presents the choices we have in selecting and arranging theses of them into design patterns. In making these decisions, emphasis is placed on basic design principles and how design relationships determine the functional, structural, and aesthetic qualities of interior spaces. The limits of interior design are difficult to define precisely since it lies in the continuum between architecture and product design. This introduction to interior design is therefore broad in space. The intent, however, is to accessible as possible, and stimulate future in depth study and research.
