朝陽科技大學 099學年度第2學期教學大綱
General Chemistry Laboratory (II) 普通化學實驗(二)

當期課號	1608	Course Number	1608
授課教師	石燕鳳	Instructor	SHIH,YENG FONG
中文課名	普通化學實驗(二)	Course Name	General Chemistry Laboratory (II)
開課單位	應用化學系(四日)一A	Department	
修習別	必修	Required/Elective	Required
學分數	1	Credits	1
課程目標	理論加上實驗永遠是最完美的組合，幫助學生養成對已知化學理論加以求證的習慣，並學習一般化學藥品的處理方法。完成這些訓練不單單對化學反應或化學藥品有更深一層的了解，同時在遇到意外時，有能力去準備必要的措施。	Objectives	Introductory experimental course deals with a great deal of knowledge and innovation. In addition, this course illustrates many principles of general chemistry. Students should learn how to apply the chemical science in our daily lives. This course contains 11 experiments:1. Chemical equilibrium 2. The titration of acid and base 3. Reversible oxidation-Reduction color changes 4. The study of oxidation of iron 5. Introduction to Chromatography; Paper Chromatography 6. Analysis of cations 7. Analysis of anions 8. How to make a good detergent? 9. Shampoo (part I) 10. Shampoo (part II) 11.Hand lotion.
教材	1.化學技能檢定題庫解析,科友圖書公司 2.補充講義	Teaching Materials	By handout and transparency
成績評量方式	實驗態度20%, 預報15%, 結報15%, 平時考15%, 期中考15%, 期末考20%	Grading	Attitude 40%, pre-Lab. report 15%, Quiz 15%, Lab. report 15%, Final Exam. 15%
教師網頁			
教學內容	透過實驗的過程來學習並驗證化學基礎理論,還有了解一些生活現象的發生	Syllabus	This course illustrates many principles of general chemistry. Students should learn how to apply the chemical science in our daily lives. This course offers 12 laboratory sections, along with weeks for organizations and examination.
