課程目標	自由軟體賦予使用者執行、研究、散佈、改進等四大自由。看似抽象的原始初衷，卻造就了今日的 GNU/Linux 使用者得以享受十分務實的「20公克筆電」行動自由。它同時也激發了法學教授對於走火入魔智慧財產權的省思，進而帶動了一波自由文化的社會運動風潮。它的開發模式、教育應用、數位落差意義及校園推動，也都是本課程探討的議題。	Objectives	Free software gives users four freedoms: freedoms to execute, study, distribute, and improve the code. These philosophical and seemingly theoretical ideals eventually brought about very practical consequences such as the freedom of "20 gram notebook computer", to GNU/Linux users. It also inspired a law professor to reflect upon the uncontrolled expansion of the "intellectual property rights". The result is the free culture social movement that challenges such expansion. In this class, we also discuss the development model, educational applications, meanings to digital divide, and the diffusion into campuses of free software.
