The financial calculator is applied for the quick and exact answer for the mortgage calculation. The exercise of financial feasibility analysis of large-scale and long-term project is also provided in the class for professional training for investment analyst. So the first year project will use the option model to establish various conditions to evaluate the loan defaults of real estate mortgage and the risk of prepayment. The second

year project will include a variety of
mortgages under the prepayment
penalty and then estimate the value of
real estate mortgage loans model,
which are not considered by Sharp et
al. (2009) and Chen et al. (2009).
